CAREER OBJECTIVE

Aspiring **Software Developer** with a strong foundation in **Java, Spring Boot, and SQL**. Passionate about building efficient, scalable, and maintainable software systems using modern development practices such as **Agile methodologies, RESTful API design, and Object-Oriented Programming (OOP)**. Eager to contribute to innovative projects, improve system performance, and grow in collaborative environments.

EDUCATION

Bannari Amman Institute of Technology, Sathyamangalam B.Tech in Computer Technology CGPA: 8.15 (Up to 6th Semester)	2022 – 2026
R G Matric Higher Secondary School 12 th Grade – 89.3%	2021 – 2022
R G Matric Higher Secondary School 10 th Grade – 97.4%	2019 – 2020

TECHNICAL SKILLS

Programming Languages: Java, C, React js, Python, SQL, MYSQL, HTML, CSS
Frameworks & Libraries: Spring Boot, Django, OpenGL
Databases: MySQL, SQLite
Developer Tools: Git, GitHub, IntelliJ IDEA, VS Code, MySQL Workbench
Concepts: Data Structures and Algorithms, OOP, RESTful APIs, Software Development Life Cycle (SDLC), Debugging, Version Control, Problem Solving
Deployment: Vercel, Railway, Render, Aiven

PROJECTS

Railway Reservation System	<i>Java (OOP, Console Application)</i>
- Designed and developed a console-based ticket reservation system in Java for managing passenger bookings, seat allocation, and cancellations. - Implemented dynamic seat allocation and data persistence to improve performance and maintainability. - Followed object-oriented design principles ensuring scalability and modularity.	
Bank Loan Management System	<i>Java, Spring Boot, React, REST API</i>
- Designed and developed a full-stack web application to manage loan applications, approvals, EMI calculation, and document verification. - Implemented role-based access control (Admin/User) with JWT authentication for secure login and authorization. - Built interactive dashboards for users and admins to track loan status, approvals, and repayments. - Integrated EMI calculator and loan eligibility logic to improve user decision-making. - Used RESTful APIs for seamless communication between frontend and backend.	

Hotel Booking System

Python (Django), MySQL, HTML, CSS

- Built a **web-based hotel booking system** using Django and MySQL for data management and real-time availability tracking.
- Designed normalized database schemas and optimized SQL queries for high efficiency.
- Implemented CRUD operations, authentication, and responsive front-end templates.

Robotic Arm Simulation (OpenGL)

C++, OpenGL, HTML, CSS

- Developed a 3D robotic arm simulation to visualize motion, path planning, and obstacle avoidance.
- Rendered realistic motor coordination using OpenGL for 6-axis control.
- Role: **Frontend Developer** | Team Size: 6 | Demonstrated real-time rendering and graphics programming.

AREAS OF INTEREST

Software Development | Backend Development | Problem Solving | Database Management | Finance
API Development | Deployment | AI Tools

COURSES & CERTIFICATIONS

Java Programming and Software Engineering Fundamentals Specialization – Coursera
Gained expertise in OOP, version control with Git, modular design, and software lifecycle management.

CO-CURRICULAR ACTIVITIES

-
- **Paper Presentation – Quantum Robotics (Oct 2024):** Galaxy '24 Phase II, Government College of Engineering, Erode.
 - **Paper Presentation – Artificial Intelligence in Precision Medicine:** International Conference on Sustainable Resilient Remediation (ICSRR'23), Anna University, Chennai.

EXTRA-CURRICULAR ACTIVITIES

-
- **Student Trainee:** Skill Training Program (Java) – strengthened backend and OOP skills.
 - **Volunteer:** Managed registrations for Elanza'24 with over 600 participants, ensuring seamless coordination.

PERSONAL SKILLS

Leadership | Teamwork | Adaptability | Time Management | Communication

LANGUAGES

English (Read, Write, Speak) | Tamil (Read, Write, Speak) | Kannada (Speak)
